

Course Outline

Advance Skin Care Training Program

(H2t Pumpkin Peel 30, T.C.A., Intensive Retinol Peels, Microdermabrasion, and Skin Lightening)

The primary purposes of the advance peel program is for licensed skin professionals to gain advanced esthetic skills in medical spa and clinical settings.

OBJECTIVES:

Upon completion of the program requirements the skin care professionals will be able to:

1. Reflect a strong a business and professional work ethics.
2. Professional integrity and self confidence along with the practice of effective communication skills.
3. Perform appropriate advanced clinical and medical spa skills.
4. Practice affective business building skills and successful services.
5. Mastering the use of Advanced Chemical Peels, Microdermabrasi developing skills to utilize different Protocols in layering of chemical peels.
6. Product prescription and education of the client in proper home care regiment.
7. Create a new profit center by following "TO THE POINT" Protocol & Technique.

To ensure continued career success, the license professional will continue to learn new and current information related to techniques and methods for career development in medical spa and clinical esthetics. Our unique medical process combines a preconditioning and layering system that allows for significant change of the skin surface with little to no down time. We have integrated these strategies into a user friendly platform focusing on a highly advanced chemical peel skill-set. Our Skin Rejuvenation Program will allow for each attendee to confidently use and layer our refined Retinol Treatments. T.C.A & h2t pumpkin peel 30 to achieve remarkable results. You will also be taught how to combine innovative protocols including micro-exfoliation to safely treat acne scarring, hyper-pigmented and all forms of pre-mature aged skin issues and more...
